

## Seeking Postdoctoral Candidate in CIQUS at metbiocat group

**Research work:** Collaborative project at the interphase between catalysis, chemical biology and materials science.

This is an excellent opportunity to learn and work in a multidisciplinary group and in a challenging and cutting-edge research environment, in one of the best research centers of Chemistry in Spain.

*This position will be funded by a POCTEP project.*

### Description

**Research topic:** “Metal-mediated catalysis at the interface between chemical biology and materials science” ([Prof. José Luis Mascareñas](#)).

**Research Center:** CIQUS ([www.usc.es/ciqus/en](http://www.usc.es/ciqus/en)), University of Santiago de Compostela (Spain)

**Group:** Metbiocat ([metbiocat.eu](http://metbiocat.eu))

**Starting Date:** Between June and November, 2019.

**Terms and conditions:** Full-time one-year contract, with possibility of extension for at least another six months.

### Requirements

- PhD in Chemistry. Excellent academic and scientific record, with some publications in top journals as main author. Experience in research activities in *synthesis and organometallic chemistry*.
- We seek outstanding individuals with initiative, creativity and team-working ability. Strong commitment for scientific excellence in a highly competitive environment is a must.
- Previous experience in chemical biology, as well as in materials science will be highly considered.

**Applications:** Send a brief CV (maximum 2 pages) by e-mail to [jose Luis.mascarenas@usc.es](mailto:jose Luis.mascarenas@usc.es), indicating in the subject “*Postdoc position @metbiocat*”.

The name and email of two contacting professors or researchers that know the candidate should be provided. Reference letters for preselected candidates will be required.

**Deadline** May 15th, 2019
